

The fourth generation of GoodWe's DNS single-phase inverter with dual MPPTs is a powerful and compact solution for residential solar installations. Designed to support the latest high-power PV modules, the DNS G4 allows up to 200% PV oversizing and 20A input current per string. It offers superb compatibility, flexibility, and easy system expansion with MS G4 series via the EzLink3000 smart dongle – with no need for a datalogger. DNS G4 is quiet (<25dB), lightweight, and cyber-secure. Optional features include Al-driven Arc Fault Circuit Interrupter (AFCI) 3.0, built-in Rapid Shutdown 2.0 transmitter, and Type II SPD on both AC and DC sides. With wide voltage range, modular design, and smart meter integration, DNS G4 delivers optimised performance and highest safety standards.

200% PV oversizing & 20A max per string

Optional Al-driven AFCI 3.0 & standard SPD Type II (AC & DC)

Easy paralleling via EzLink3000 smart dongle

<sup>\*1:</sup> About GW3.6K-DNS-G40 for the UK market, both nominal output current and max. output current are 16A.

Plug and play connector (Max. 6mm<sup>2</sup>)

<sup>2:</sup> When the input voltage ranges from 560V to 600V, the inverter will enter the standby state. When the input voltage returns to the MPPT operating voltage range of 40V to 560V, the inverter will resume normal operating state.
\*3: Please refer to the user manual for the MPPT Voltage Range at Nominal Power.
